PROFESSIONAL SUMMARY

Results-oriented Data Analyst with a proven track record of leveraging data to drive informed decision-making. Skilled in SQL, Python, Power BI, and Tableau, with a strong foundation in data analysis, visualization, and predictive modeling. Passionate about uncovering actionable insights and translating data into tangible business outcomes.

SKILLS

- **Programming:** Python (Scikit-learn, Pandas, NumPy, Flask, Matplotlib, Seaborn)
- **Data Visualization:** Power BI, Tableau, MS Excel, Plotly
- **Data Analysis & Critical Thinking:** Problem-solving, communication, collaboration
- **Database Management:** MySQL, PostgreSQL, MongoDB
- **Tools:** Flask, Jupyter Notebooks, VsCode, Git

EXPERIENCE

INB Vacations

July 2022 – December 2022

Data Analyst Intern

- Optimized and delivered pipeline efficiency using SQL and Python, simplifying complex datasets and **leading to a 15% improvement** in operational effectiveness.
- Developed a data-driven dashboard in Power BI to identify key trends, **leading to a 15% improvement** in decision-making.
- Automated data extraction processes, **reducing manual work by 20%** and **increasing data analysis speed by 30%**.

Fairdeal.Market

June 2023 – August 2023

Data Analyst Intern

- **Contributed to** the creation of a no-code brand dashboard, accelerating deployment time by 25%.
- **Improved data quality by 20%** through rigorous testing and validation, enhancing accuracy in business reporting workflows.
- Collaborated with cross-functional teams **to improve data collection strategies** and streamline reporting data analysis processes.

Fairdeal.Market

September 2023 – Feb 2024

Business Analyst

- Designed and **implemented strategic dashboards** in Excel and Power BI, to empower brands with data-driven insights for dynamic decision-making.
- Engineered a **Python-based data extractor** using Flask, automating information retrieval and enhancing stakeholder access to critical data.
- Led a team project to standardize data formats, **resulting in a 10% reduction in data discrepancies** and improved reporting consistency.

EDUCATION

Bachelor of Computer Applications

August 2014 - May 2017

Institute of Information Technology & Management

New Delhi

CGPA: 6.9

Master of Computer Applications

August 2017 - May 2020

Bharati Vidyapeeth's Institute of Computer Applications and Management

New Delhi

CGPA: 7.9

PROJECTS

Olympic Games Analysis [Power BI | SQL]

- Developed a comprehensive Power BI dashboard to visualize historical Olympic Games data, **increasing user engagement by 20%** and providing insights into country performance over time.

Data Science Job Analysis (2023) [SQL | PostgreSQL]

- Conducted an analysis of job postings using PostgreSQL, extracting insights into industry trends and sought-after skills.

Predicting Credit Card Consumption [Python | Predictive Modelling]

- Built a predictive model using Python to forecast customer credit card usage for a leading bank, leveraging customer demographic and behavioural data.

Sales Trends Analysis for Pharmaceutical Company [Python | Data Visualization]

- Created a data-driven dashboard to visualize sales trends and identify key performance indicators (KPIs), providing actionable insights for sales planning.

Text Extraction and NLP Analysis for Web Articles [Python | NLP]

- Developed a Python solution to extract and analyse text from web articles, computing sentiment scores, readability metrics, and complexity indices.

CERTIFICATIONS

- Data Analytics with Python** AnalytixLabs (2021)
- AI & Deep Learning using Python** AnalytixLabs (2022)
